

## Valley Panel - Shingle or Metal W Valleys VP-DC

### Overview

The IceBlaster VP-DC is specifically designed to prevent ice dam and icicle build up in the valleys, along dormers, around chimneys and skylights, and any area where a defined melt path is needed. The highly efficient system is comprised of an aluminum extrusion base panel which houses two runs of industrial grade self regulating heat cable. Installation is simple. Base extrusion mounts over existing valley shingles or metal valley flashing with a suitable adhesive. Route two runs of industrial grade self regulating heat cable. Pre-finished aluminum cover panel clamps on base panel for maximum heat transfer. Route any heat cable in gutter and downspout(s). The IceBlaster VP-DC can be combined with other EMS products for a comprehensive ice dam prevention system.

**NOTE:** Some roof assembly features omitted for clarity. IceBlaster products are fully compatible with most roof styles and systems. IceBlaster Valley Panel can be installed metal W valley styles or shingle woven valley styles.

### Performance:

2 runs of self-regulating industrial grade heat cable

### Base Extrusion:

6063 T5 Aluminum

### Cover Panel:

0.040" Kynar 500 pre-finished aluminum

### Warranty:

50 yr on base panel

30 yr on cover panel finish

10 yr on supplied heat cable

See Warranty for complete details

### Supplied Components:

Base extrusion

Panel cover

Splice covers

Mounting hardware

C/US Listed self-regulating heat cable

### Options:

110-130v or 208-277v in 5, 8, & 10 watts/foot self regulating heat cable

Standard Colors: Medium Bronze, Matte Black, Dark Bronze, Hartford Green, Mansard Brown, Slate Gray, or Charcoal Gray

### Additional Cost Options

20 oz. solid copper

Special Order Colors: Complete line of PacClad aluminum colors

Standard 5' & 10' lengths, can be cut to length
