

Speciality Panel - Snow Melt Panel SP-SM

Overview

The IceBlaster Snow Melt Panel (SP-SM) is specifically designed to prevent snow and ice dam build up at the eaves, on lower shed style roofs, under skylights, on standing seam metal roofs, and other locations where a larger melting area is desired. The highly efficient and useful system is comprised of an aluminum extrusion base panel which houses two runs of industrial grade self regulating heat cable. Installation is simple. Base extrusion mounts over existing roofing with supplied cleat and/or adhesives. Route two runs of industrial grade self regulating heat cable. Pre-finished aluminum cover panel is riveted to base panel for maximum heat transfer. Route heat cable in any gutter(s) and downspout(s).

NOTE: IceBlaster products are fully compatible with most roof styles and systems. Snow Melt Panel can be used in conjunction with other EMS products. SP-SMP can be fastened to roofing with a cleat, adhesive/sealant and other methods depending on roofing materials. This panel is useful for controlling snow build up on lower sloped roofs where heavy drifting is a concern.

Performance:

2 runs of self-regulating industrial grade heat cable

Base Extrusion:

6063 T5 Aluminum

Cover Panel:

0.040" Kynar 500 pre-finished aluminum

Warranty:

50 yr on base panel
30 yr on cover panel finish
10 yr on supplied heat cable
See Warranty for complete details

Supplied Components:

Base extrusion
Panel cover
Splice covers
Mounting hardware
C/US Listed self-regulating heat cable

Options:

110-130v or 208-277v in 5, 8, & 10 watts/foot self regulating heat cable

Standard Colors: Medium Bronze, Matte Black, Dark Bronze, Hartford Green, Mansard Brown, Slate Gray, or Charcoal Gray

Additional Cost Options

20 oz. solid copper

Special Order Colors: Complete line of UnaClad aluminum colors

Standard 10' lengths, can be cut to length
